*"Integrating life safety, building management and communication systems technology to meet the emerging needs of the educational, commercial, and institutional marketplace."*

Syracuse Time & Alarm Company is a privately held corporation serving Upstate New York since 1981. We currently staff offices in Syracuse and Binghamton. We believe in working closely with customers, evaluating their needs, and delivering quality products, customized solutions, and comprehensive training.

Our market area extends from Buffalo in the west, Albany in the east, north to the Canadian border and south into Pennsylvania.

We are much more than a distribution and repair company. We provide our customers long-term solutions to their strategic plans and a highly trained technical staff to implement those solutions. Our system design and technical teams are vertically aligned to complement each other. They are as follows:

## **BUILDING SYSTEMS:**

Responsibilities include fire alarm systems, access control, digital badging systems, security, CCTV, door entry, emergency aid, parking/revenue control systems and watch tour systems.

## **SOUND & COMMUNICATIONS:**

Responsibilities include school sound and communications, nurse call systems, emergency response systems, pro-sound, intercom, site paging, converged telephone systems featuring VoIP, TDM and network integration. Voice mail and integrated messaging, data networks, distance learning, media distribution (CATV), and IP media management systems.

## **TIME & DATA COLLECTION:**

Responsibilities include time clocks, automated time & attendance and job cost systems, master and wall clock systems, street, post and tower clocks.

Our skilled technicians are available 24 hours a day, 365 days per year. Members of our highly motivated and well-trained team, undergo continual cross training on the many diverse systems we support. Whenever possible, technicians are assigned to key sites facilitating the highest level of familiarity and continuity.
