NEWFIELD CSD

Advanced Communication Systems Improve School & Student Safety

Over the summer, Syracuse Time & Alarm Co., Inc. installed a [Rauland Telecenter U](#) at the Newfield school district.

We provided an IP public address system (via a dedicated IP network) which allowed for critical communication. In addition to that, the system is also being utilized for event management, & centralized bell scheduling.

With the Telecenter U, district-wide notifications and announcements are far easier to deliver, enabling far more flexibility in terms of programming and capabilities, live or recorded, for this multi-building school district.

Is the Rauland Telecenter U Right for You?

Designed specifically to meet the needs of schools, utilizing the communications

equipment you already have in place throughout your school. The [Rauland Telecenter U](#) offers a complete network-based system to connect your entire school district in a single unified solution. The system integrates and manages emergency coordination, daily events such as bell scheduling, and everyday needs including morning announcements and classroom to front office communications. And when an emergency strikes, you're prepared with

a tested communications plan easily initiated by a single action by authorized staff. It's easy to use because your staff uses it everyday, all day.
