MASS NOTIFICATION EDITION

NOVELIS OSWEGO WORKS **One System - Many Savings**

Syracuse Time & Alarm Co., Inc. has worked on the facility's Fire Protective Signaling System at Novelis Oswego Works for almost 20 years to keep it operational. Recently, we have made additions to the system as part of two major expansion projects.

We provided a GW-FCI E3 Mass Notification and Fire Detection Signaling system that not only performs wonderfully on its own, but is integrated with the facility's proprietary system so the alarm notifications and paging work together as one.

With one system for both Mass Notification and Fire Alarm Signaling, paging priority is controlled by one system eliminating the possibility of paging conflicts during an emergency. Using the GW-FCI E3 for paging saved the company from having to buy separate systems, resulting in significant cost savings for both projects.

We look forward to our continued partnership with Novelis Oswego Works!

IS THIS SYSTEM RIGHT FOR YOUR FACILITY?

Gamewell FCI's E3 Series offers a mass notification system (MNS) that can be configured as a standalone voice or incorporated into a state of the art UL 9th Edition, networked fire alarm system.
