IMPROVING OUTCOMES & ACCOUNTABILITY

The needs of patients are increasingly complex which places even greater demands on caregivers. The **Jeron Provider 790 Nurse Call System** gives you the communications, alerting and workflow tools to address the unique requirements of your patients and facility today...and tomorrow.

The Provider 790 is a fully customizable and scalable solution leveraging VoIP technology. It offers:

- **Streamlined Touchscreen Communication**
- **Real-time Alerting and Communication**
- **Customized Workflow Stations**
- **Patient Rounding and Reminders**

Check out this recent case study...

Oswego Hospital approached Syracuse Time and Alarm Co., Inc. asking for assistance to upgrade the existing nurse call system for the facility's Maternity Center, Intensive Care Unit and the 3rd and 4th patient floors. We immediately went to work on the project design, obtaining electronic drawings of the facility and held meetings with the appropriate staff to better understand both their immediately and future system needs.

Oswego Hospital requested that its new call system have the capability to report all activity and include a computer interface that could be viewed from anywhere on the hospital network.

We recommended the **Jerom Provider 790 Nurse Call System**. It easily met the immediate needs with an eye towards possible future add-ons at a lower cost than similar systems. In the future, Oswego Hospital is interested in tying in wireless devices, such as pagers and phones, integration capabilities with other systems, as well as the ability to track patients, equipment and staff members.

This new system allows Oswego Hospital staff to have full robust voice communications directly with their patients at the click of a button. Additionally, the system is self-monitoring and will immediately report any issues to the main console, as well as to the maintenance staff, ensuring patient safety in addition to decreased response times.

"The new nurse call system is much more efficient allowing us to improve patient satisfaction, which is extremely important at Oswego Hospital," said Oswego Hospital Chief Nursing Officer Valerie Favata.

"Syracuse Time and Alarm was very respectful of our patient needs and worked to ensure that call service wasn't interrupted during the installation!" --Timothy Overholtzer, Facilities Director
