Exciting News! - New Service and Distribution Center

Syracuse Time & Alarm Co., Inc. is excited to announce our new "Service and Distribution Center" located at 6444 Ridings Road in Syracuse. The addition of this new facility is part of our ongoing strategic process improvement plan.

- Increased stock levels for faster turn around on orders.
- Expanded Service facilities for testing and repairs.
- A brand new "Pre-installation Assembly Department"...This department will allow us to pre-assemble, program and test major systems prior to delivery to customer sites greatly reducing installation and trouble shooting time in the field.
- Contractor deliveries from our center will be clearly labeled for project installation.

Combined, the above improvements allow us to provide a better end product, faster delivery times and the ability to become more efficient in project deployment as we continue to expand our business throughout Central New York.

System Galaxy is a hardware and software management solution that seamlessly integrates Access Control, CCTV and Facility Security. Compatible with Microsoft WindowsXP (or higher) environments. System Galaxy interacts with other 3rd party systems. System Galaxy is web client accessible so it can be managed anywhere you can use your favorite browser. System Galaxy is completely scalable and offers a wide selection of in-demand features that integrate standard and emerging technologies. With System Galaxy you can deploy any combination of features; access control, alarm/event monitoring, intrusion detection, surveillance,

elevator control, identification & credential management, photo imaging & badging, time & attendance, visitor management, reporting, and more!

Tech Tip

To maintain competitiveness and support our customers needs, Syracuse Time & Alarm Co., Inc. estimates costs with an expected amount of labor for each project based upon its unique scope. Our technicians arrive at a site expecting the devices to be terminated and free from opens, grounds and/or shorts. We supply typical drawings for all field devices and a riser for the system. If these are not received or understood, please contact your Salesman or Project Manager. Let's work together to avoid costly mistakes for all.

Employee Spotlight

Sean Kunai, Warehouse Manager, has been with the company for over five years and has helped with the organization of our inventory and ordering processes streamlining them to make them more efficient and accurate. After serving in the U.S. Marine Corps, Sean graduated from the University of North Carolina at Charlotte with a BS in Criminal Justice. With over 9 years experience in managing shipping, receiving and purchasing operations for three different companies, he will be taking on the challenge of implementing and running the operations of our new Service and Distribution Center. As many of you have met Sean throughout the years, I am sure you recognize how this important role is vital to the operations of our company and we are lucky to have his experience on-board with Syracuse Time & Alarm Co., Inc.
