The DragonFly™ Portable PA System

Technomad DragonFly Weatherproof PA System

The **DragonFly™** is the commercial AV industry's first self-casing, all-in-one weatherproof, portable PA system. Technomad's DragonFly™ Weatherproof PA system delivers high quality audio and Technomad's unsurpassed product flexibility and ruggedness. Fully weatherproof, the DragonFly™ can easily be transported and set up by one person. A molded in stand-mount socket on the bottom of the unit and inserts on the sides for yoke mounting give the DragonFly™ a range of deployment options.

Contact us for more information on this portable, easy to use system!

Check out this recent case study...

Carthage CSD **Portable..Light..Rugged..LOUD!**

The product we supplied Carthage CSD is a Weatherproof portable PA system named DragonFly™, by Technomad. They purchased it to use in their 8-lane swimming pool for swimming and diving meets.

It is equipped with a wireless microphone, CD player and a input for an I-Pod. With its companion speaker, it can cover a crowd of 200+ listeners with CD quality audio and highly intelligible voice projection in a system that can withstand the harsh environment of a pool...all in a completely weatherproof system.

They also plan to use it for outside events and in case of power outages!
